TEACHING

Courses Taught (Designer[§], Course Director[†])

CS 380 - Computer Organization^{§†} : I designed this course to give students an appreciation of how the code they write is influenced and impacted by the underlying hardware. The course is the students’ first introduction to C programming, and is required by all majors. AY16, AY17, AY18-1, AY19

XE 401/402 - Integrative Capstone Experience : Supervised and provided technical mentorship to 10 capstone teams over the Computer Science, Information Technology and Electrical Engineering programs, involving approximately 37 cadets. Several students have written papers that were accepted to peer-reviewed venues, and won awards for their capstone work. AY15, AY16, AY17, AY18, AY19.

CS 474 - Fundamentals of Computer Theory[†] : Introduces students to the theoretical underpinnings of the computing discipline, including the classes of problems that can (and cannot) be solved by modern computers. AY14-1, AY17-2, AY18-2, AY19-2.

CS489 - Advanced Individual Study in Computer Science : An opportunity for students to explore advanced topics in computing through a personal research project that is conducted over the course of a semester. AY15-1, AY18-2.

CS 485 - Parallel Computing^{§†} : An upper-level computer science elective that I designed to help pilot the introduction of parallel computing concepts into the core CS curriculum. A significant portion of the parallel computing concepts covered in this course were incorporated into the design of CS380. AY15-2.

CS 301 - Fundamentals of Computer Science^{§†} : First course in sequence for Computer Science majors. While the course was originally taught in Ada, I was tasked my first semester as a faculty member to redesign the course completely. The version I designed introduced students to the Python language, in lieu of Ada. The course would go on to be the first course in major for CS majors, IT majors, and students in the Cyber sequence. AY13-2, AY14, AY15.

IT 105 - Introduction to Computing & Information Technology : CS0 core course that is required for all freshmen at West Point. Provides a breadth-first introduction to computing, information technology, and electronics. AY13-1.

Other Advising

Department Academic Counselor : I have served as the official Department Academic Counselor (DAC) for 20 computer science majors. I helped them create their 8-term academic plans, advised them on electives, and helped them solidify their plans for after graduation.

Graduate School Mentor : I have mentored additional cadets through the scholarship process, even though they did not directly do research with me. I helped them understand the path to graduate school, what options are possible, and wrote letters of recommendation for them. Three are currently attending graduate school on competitive scholarships.
